### **JCM Global Brings Security, Connectivity to FADJA 2018**

LAS VEGAS (March 20, 2018) – Casino operators across Colombia and throughout Latin America rely on JCM Global to help protect their assets and increase customer connections. Now in booth #37A at FADJA 2018, JCM will show its award-winning product line that features innovative technologies to boost security and deepen customer connections.

JCM will show a range of bill validation products beginning with iVIZION®. It is known worldwide for its powerful combination of sensing and anti-fishing technologies, including its CIS technology that scans the entire note or ticket, reading more than 9.5 million data points on every note, more than twice that of the nearest competitor.

The TBV is exceptionally popular throughout Latin America because it accepts single note and bulk note transactions, accepts multiple denominations and currencies simultaneously, and its bulk note feeder accepts up to 50 notes for quick processing of large stacks.

iPRO-RC combines high levels of security with the efficiency of note recycling, and the RDM processes notes at an incredible 6 notes per second, with a 250-note capacity reduces load frequency.

JCM's powerful GEN5 thermal printer is equipped with a faster CPU and faster print speed, and has the flexibility to print TITO and promotional tickets, and various wager tickets and templated promo coupon

Next, JCM's PromoNet floor-wide promotional couponing system helps operators directly reach both carded and uncarded players across the casino floor, increasing customer connections and improving the customer experience.

Last, JCM's BlueWave™ firmware upload tool makes firmware upgrades fast, simple, and easy.
