The JCM web site provides the tools you need, including the software information database with DIP switch information, our photo parts catalog, online ordering form, repair service, and more.

Parts are Parts

Part No. 052558

Description: P U Cover

Usage: The P U or Pusher Unit Cover is part of the cash can pusher mechanism. This piece covers the rollers, belts and O-rings that are used to move the note from the stacker into the cash can.

Note: The combs of the cover are used in conjunction with the rails in the frame assembly to align the cashbox bill path to the transport. These can become cracked or broken during drop procedures. If this happens, the cover should be replaced to prevent contaminants from entering the cash can pusher mechanism.

* an "i" suffix indicates Intelligent Cash Box option.

The list of JCM bill validator software provided herein notifies customers of the latest versions developed. However, the listing does not identify versions approved by gaming jurisdictional authorities for actual use. Customers should consult JCM's Customer Service/Parts Sales departments concerning approved versions for jurisdictions of intended use.

Save Time and Labor with JCM's Intelligent Cash Box System

The ICB[®] (Intelligent Cash Box) system is a unique cash box/cash flow management system that allows the operator to track a cash box and its contents through the entire cash flow process. The ICB system eliminates the need for dedicating cash boxes to specific machines, or putting barcode identification on the cash boxes. The cash boxes are tracked electronically eliminating most variance issues.

The next generation of validator shown at G2E

Question: How do you improve on the number one selling validator in the industry for the past 8 years?

Answer: From the first days of gaming validators, JCM has been the leader in transaction technology. From the first DBV-145 to the revolutionary WBA, JCM has a long history of listening to the needs of its customers and responding with innovation.

The next generation of validators was shown at this years G2E gaming show and the innovations were clearly evident. More features geared toward durability, ease of maintenance, superior acceptance capability, the latest in counterfeit protection and customer satisfaction.

Advancements that add new value to your gaming floor and yet maintain compatibility with your existing equipment. The Universal Bill Acceptor (UBA) is the next generation in Bill validation equipment. Contact your local JCM sales representative for more information or to schedule a UBA demonstration.

Please contact your local JCM sales representative for additional information or to schedule a UBA demonstration.
