Parts are Parts

Part No. 149468

Description: iVIZION Frame

Usage: The iVIZION Frame ① contains several new innovations: The Rail System that supports the Cash Box is wider ② to ensure proper alignment of the Cash Box and Validation Head. The Frame uses an open design that allows the Validator Transport and Stacking Drive Gears to directly contact the Cash Box Gears ③; consequently, the Cash Box can be re-seated without opening the Cash Box vault. Simply remove the Validator Head from the Frame and the Cash Box can be manually re-seated ④ into the Frame.

Note: The iVIZION Frame can also be converted into an Up-stack version by changing the type of Harness.

Save Time and Labor with JCM's Intelligent Cash Box System

The ICB® (Intelligent Cash Box) system is a unique cash management system that allows the operator to track a Cash Box and its contents through the entire cash process. The ICB system eliminates the need for dedicating Cash Boxes to specific machines, or putting barcode identification labels on the Cash Boxes. The Cash Boxes are tracked electronically eliminating most variance issues, and with the custom reports provided to each department, accuracy and efficiency is greatly improved.

Technical Bulletin 201106 June 2011

Technical Tips

Question: How do I integrate the new iVIZION Cash Box into my ICB floor?

Answer: The iVIZION Cash Box is slightly wider than a standard WBA or UBA Cash Box. A new Docking Station ① has been created that is able to accommodate both types of Cash Box Cans, and also contains some new features.

The new Docking Station (Part # 550-100715R) contains a Self-centering function that places the Cash Box Can being read in the perfect position every time it is inserted. It is also capable of accommodating both Standard and Large Note Cash Boxes.

The Unit features a slide-in style tray that places the Cash Box in the perfect position to read an IR Signal from a WBA or UBA Cash Box Can. And it can read the RFID signal used in an iVIZION Cash Box as well.

The Unit features an LED that informs the user when the Unit is Reading the Cash Box (Blue) ②, when the Cash Box is ready to be removed (Green) ③ and when an error in reading the Cash Box is detected (Red) ④.

Docking Station LED Indications
