JCM Global Creates Better Connections at ICE 2015 with Bill Validation Technology, Printer Technology and System Solutions

DUSSELDORF, Germany (January 19, 2015) – At ICE 2015, JCM Global is helping operators create better connections with better, smarter, faster bill validation technology, printer technology and systems solutions. JCM will show its advanced and diverse product portfolio on stand N3-220.

The connection begins with JCM's **bill validation technology** featuring iVIZION®, iPRO™ and iPRO-RC™. First, iVIZION has the most advanced validation security features and anti-stringing technology available, all with an acceptance rate of 99+ percent. Learn more at www.iVIZION.jcmglobal.com.

Secure, flexible and innovative, iPRO™ has a high first-time acceptance rate, a fast note-to-note acceptance rate, and JCM's innovative sensing and anti-stringing package. An optional recycling package on the iPRO-RC™ means less fills less often.

Connections are enhanced with JCM's **printer technology** and the PayCheck 4™, GEN2 Universal™, TableXchange® and Coupon Express™, among others.

The GEN2 Universal family of printers is compatible with existing gaming platforms (RS232 and NetPlex) as well as the next generation of downloadable, server-based and USB games. GEN2 Universal printers offer compatibility with existing games on the floor.

TableXchange brings the convenience of TITO to the table by both accepting and paying out with TITO tickets, allowing full two-way transactions compatible with existing casino TITO systems, increasing convenience for players and streamlining operations by virtually eliminating the need to replenish chips at table games.

The connection is completed with JCM's **system solutions**, including Dynamic Network Applications™ (DNA), PromoNet® and Ticket2Go™. DNA empowers operators and regulators with real-time health and event monitoring of all peripheral components used inside EGMs, on table games or inside redemption kiosks, utilizing either a wired or wireless connection to a local server. Peripherals that DNA can monitor are practically limitless and include bill validators, ticket printers, card readers, digital displays and coin acceptors.

PromoNet® intelligent couponing identifies valuable players, targets both carded and non-carded players, links promotions to game-play and delivers promotions exactly where and when they are needed.

Perfect for AWP and low payout markets, Ticket2Go delivers a networked TITO solution and the proven network-less Ticket Payout feature. Multi-lingual and multi-currency, Ticket2Go offers a retrofit ticketing solution for gaming machines that do not support open standard ticketing protocols.

Start making better connections by joining JCM at ICE on stand N3-220 and on Facebook, LinkedIn and Twitter.

About JCM Global

JCM Global is the world's leading transaction technologies supplier for the banking, retail, kiosk and gaming industries.
