LAS VEGAS (July 13, 2021) – More than 90 percent of Native American and First Nation casinos select technology solutions from JCM Global® (JCM) for their casino gaming floors. Now at the 2021 Indian Gaming Tradeshow & Convention, JCM will unveil new technologies designed to enhance the guest experience, increase efficiencies, and boost security across the casino floor and count room.

“With more than 65 years of innovation and creativity, JCM is constantly thinking of ways to help our customers take advantage of innovative technology to make the casino floor as secure, profitable, and fun as possible,” said SVP of Sales, Marketing, & Operations Dave Kubajak. “At the Indian Gaming Tradeshow & Convention, our territory managers will be ready to partner with our customers to create a technology roadmap that suits each individual property’s and enterprise’s unique needs, today and into the future.”

JCM’s latest systems technologies enhance the guest experience, starting with the award-winning FUZION® system. Through the ICB®, PromoNet®, and iTITO™ systems modules, FUZION brings better management of support resources and financial asset tracking, increased security capabilities, enhanced player marketing, and contactless technologies to the casino floor.

Additionally, JCM’s partnership with CountR™ and their secure TITA™ system enables high-speed cash processing, TITO transactions, and contactless debit/POS transactions to the table game. JCM’s extensive line of Digital Signage Solutions also empowers operators to communicate with guests in new and unique ways in every area of the property.

JCM’s latest partnership with count/sort solutions from Cash Processing Solutions (CPS) include the 7000i™, X Range™, and V Series™ and enhance efficiency in the count room. Flexible, modular, and scalable, these sorters offer a complete count room solution for more visibility over the operation, increased efficiency, and enhanced security when partnered with the ECM™ and ICB systems.

To boost security, JCM’s leading bill validation solutions offer the highest levels of protection possible and are trusted by more Native American, First Nation, and commercial casinos than any other brand. JCM will exhibit its iVIZION®, UBA®, UBA Pro®, and DBV® 400 and 500 series. JCM will also demonstrate how FUZION enhances security in multiple ways, including suspicious activity detection, asset tracking from device to count room, and real time data.
