### **JCM Global Converts Desert Diamond Casino Sahuarita to iVIZION Bill Validators, Installs ICB Intelligent Cash Box System**

LAS VEGAS (August 29, 2022) – JCM Global® has converted more than 400 slot games at Desert Diamond Casino Sahuarita to JCM's leading iVIZION® bill validator from a competitive product. The casino's other 163 games are already equipped with iVIZION, so this new installation means iVIZION is now exclusively found on all the casino's slot games.

Additionally, JCM installed its leading ICB® Intelligent Cash Box system on each of the casino's slot games, which will dramatically improve the casino's drop process.

Desert Diamond Casino Sahuarita is the latest Desert Diamond Casinos & Entertainment property to deploy JCM's iVIZION, further strengthening the relationship between the companies. The conversion also includes preventive maintenance after the installation from JCM's dedicated service team to ensure the bill validators continue to run smoothly.

"We're excited to expand our partnership with JCM Global and implement their state-of-the-art iVIZION bill validator and ICB system across all the gaming devices at our Sahuarita location," said James O'Kimosh, Southern Arizona Slot Director for the Tohono O'odham Gaming Enterprise. "At Desert Diamond Casinos we are committed to providing the highest quality guest experience and JCM's fast, secure technology helps us continue to deliver on that promise."

"We are thrilled to again expand our relationship with Desert Diamond Casinos and to bring the security and power of iVIZION and ICB to Desert Diamond Casino Sahuarita," said JCM SVP of Sales, Marketing & Operations Dave Kubajak. "We have worked closely with Desert Diamond Casinos across their enterprise, developing technology roadmaps for each property, and iVIZION and other JCM solutions will help position the properties for success today and into the future."

iVIZION is the leading bill validator in the gaming industry, and it sees better, thinks smarter, runs faster than any validator in its class. For example, its CIS Contact Image Sensor technology reads the entire note or ticket, front and back, capturing images of both sides for unprecedented security.

JCM's award-winning ICB is proven to decrease time spent on the drop process by up to 60 percent while also increasing the accuracy of the count process. It streamlines operations, reduces variances, and boosts compliance. [Watch](#) to learn more.
