JCM AMERICAN AND KIC PRODUCTS CREATE CLEANING SYSTEM

JCM Waffletechnology™ Cleaning System Enables Bill Validators to be Virtually Self-Cleaning

LAS VEGAS (April 6, 2007) – Self-cleaning bill validators are now a reality, thanks to a new product developed by JCM American and KIC Products. The innovative “JCM Waffletechnology™ Cleaning System” activates new cleaning cycle software inside JCM bill validators.

The software was installed in JCM UBA® and WBA® bill validators during a recent update. The cleaning cycle can only be activated by the new design of the JCM Waffletechnology Cleaning System, which is ideally designed to clean the critical validation and transport functions within the JCM Bill Validators. Once activated, the Cleaning Mode Software cycles the new product to precisely and thoroughly clean JCM bill validators to maintain optimal performance.

The new product is available through the JCM sales team and JCM Waffletechnology authorized distributors. For information and a list of distributors, visit www.jcmwaffletechnology.com.

“The success of the first JCM Waffletechnology Cleaning Card was an important step in creating a more comprehensive approach to cleaning bill validators. The combination of the software update and the newly designed product allows for fast and thorough cleaning in the dynamic environment of a casino floor. This represents the first combination of software and product design and it is no surprise that it comes from JCM the leader in the Bill Validator Industry,” said Peter Klein President/CEO of KIC Products. “The result is the most advanced cleaning application ever designed for Bill Validators.”

The JCM Waffletechnology Cleaning System incorporates flexible, raised platforms on the system's top and bottom surfaces, positioned precisely to match the interior design of the JCM Bill Validators. These cleaning platforms are essentially spring-loaded, significantly increasing the pressure applied to the internal components, wiping them clean as the card passes through the mechanism.

KIC Products offers a variety of Waffletechnology designed products available for magnetic card readers found in hotel door locks, POS devices, ATM's, player tracking virtually all types of credit card readers. KIC Products has over 25 years experience utilizing the latest technology to custom engineer quality products to clean today's highly sensitive and technical equipment. Waffletechnology provides products and services built on integrity and quality to a diverse marketplace. For more information, visit www.waffletechnology.com.

JCM American Corporation is the industry leader in automated transaction handling systems and provides products, software and services to the amusement, gaming, kiosk, retail, transportation and vending industries.
