JCM GLOBAL'S AWARD-WINNING PAYCHECK™ 4 THERMAL PRINTER INTEGRATED INTO LEAP FORWARD GAMING'S SAFFARINET® ECOSYSTEM, BENEFITTING CASINO OPERATORS EVERYWHERE

LAS VEGAS and RENO (December 12, 2011) – [JCM Global](http://www.jcmglobal.com), the world leader in currency bill validation and peripheral equipment for the casino gaming industry, has successfully integrated its award-winning [PayCheck 4™ Thermal Printer](#) into the pioneering Saffari Net® ecosystem created by its strategic partner [Leap Forward Gaming](http://www.leapforwardgaming.com).

Now that it is fully integrated into the Saffari Net ecosystem, the PayCheck 4 printer can communicate to the network, and the network can communicate to the printer, empowering casino operators to quickly and easily generate coupons and other player-specific offers from the system.

JCM Global has a long list of award-winning products in its portfolio, and the PayCheck 4 has been named to the "[Best Consumer Service Technology](#)" list in Global Gaming Business Magazine's 10th annual Gaming & Technology Awards. The PayCheck 4 is the longest-lasting printer in the industry, with a print head that lasts twice as long as any competitive product and prints three times as fast.

"Our customers have been asking for an affordable, reliable, performance-driven ticket printing option for their gaming machines, and the PayCheck 4 printer delivers on those key requirements," said JCM Global President Aki Isoi "Leap Forward Gaming continues to exhibit its vertically integrated strength by offering industry solutions like the patented wireless SaffariNet ecosystem. The addition of the PayCheck 4 printer solution demonstrates JCM's ability to marry advanced ticket printer technology into game-changing system architectures such as SaffariNet to advance the industry."

LFG continues to expand its compatibility offerings to provide solutions to a wide range of operators in the gaming and non-gaming markets and welcomes the addition of the PayCheck 4 printer as yet another choice for operators utilizing their game-changing wireless SaffariNet ecosystem.

Ali Saffari, Leap Forward Gaming's CEO, added, "We are excited to have certified the PayCheck 4 as fully compatible with Saffari Net and look forward to delivering all the exciting marketing features that are possible. The PayCheck 4 printer provides capabilities that enable SaffariNet to reach its full potential. LFG is excited about this new level of partnership with JCM in developing new and innovative technologies that will add value to the global gaming industry and provide for greater operator profitability. The inclusion of JCM's patented printer solution dovetails nicely with LFG's expanding IP portfolio comprising both internally developed and acquired intellectual property. In fact, we were just informed by the U.S. Patent Office that two more patents covering our revolutionary technology will issue shortly. We are very excited for the future we will build with JCM."

About Leap Forward Gaming

Leap Forward Gaming (LFG) specializes in the innovation, development, design, manufacture, and operation of wireless communication systems.
