JCM GLOBAL'S NEW PAYCHECK 4™ THERMAL PRINTER HAS HIGHEST MEMORY IN THE CASINO GAMING INDUSTRY

LAS VEGAS (August 16, 2011) – JCM Global has proven that its new PayCheck 4™ Thermal Printer is the better, faster, stronger printer for the casino gaming industry, with unrivaled speed and durability. The new PayCheck 4 also has the most memory of any type printer, giving operators more power and flexibility to communicate directly with their customers.

PayCheck 4 has 8mb of standard memory, and that huge amount of memory empowers operators to store more fonts, images, logos and barcodes so they can personalize their players' gaming experience. Instead of printing in text only or in one-color only, only PayCheck 4 can print complete graphics and text in full color.

"Our printer has so much memory, operators can print graphics, logos, personalized offer, barcodes and more. This allows operators to communicate directly with their customers in a way that continues the property's brand experience," said Mark Henderson, VP Global Sales of JCM Global. "The memory is so high that the options are virtually limitless."

JCM's PayCheck 4 is perfect for traditional casino slot gaming, VLT devices and Class II devices, and is available now for most global jurisdictions. For information, operators should call their JCM account representative or visit JCMGlobal.com.

JCM Global is the world's leading supplier of innovative automated transactions solutions for the banking, gaming and retail industries. With unsurpassed service and support, JCM Global is trusted by operators, manufacturers and integrators on six continents. Its extensive line of award-winning products set global standards with ground-breaking products like the iVIZION®, Universal Bill Acceptor (UBA®) and Vega-RC™ bill validators, Intelligent Cash Box (ICB®) and PayCheck 4™ thermal printer.
