The JCM Global Website provides the tools required to service all of our products. This includes a Software information database containing DIP Switch information, Customer Notifications, Product Manuals, Diagnostic Applications and more.

## Parts are Parts

**Part No.** 550-100720R

**Description:** DT-200 BlueWave Device Tool

**Usage:** The DT-200 BlueWave is a hand-held, Battery operated download Device that is compatible with the iVIZION, UBA, WBA, DBV-30x, PUB7/ 11, and EBA-3x product lines. The Tool features removable SD Card technology to quickly change from one Software Protocol to another.

The BlueWave Tool uses USB Cable connections for the iVIZION and UBA, and Serial connections for WBA, PUB, DBV and EBA connection. There are LEDs to indicate the Battery status, download progress and any download faults.

**Note:** Kits including the DT-200 BlueWave tool and one Harness are available. Harnesses may be ordered separately, as-well-as additional BlueWave Device Tools.

EBA-03	2	UBA 10/11/14/24/25	3
ICB	3	WBA-1X/2X	1
Tiako (PUB-7/11)	1	iVIZION	A

## Save Time and Labor with JCM's Intelligent Cash Box System

The ICB® (Intelligent Cash Box) system is a unique cash management system that allows the operator to track a Cash Box and its contents through the entire cash process. The ICB system eliminates the need for dedicating Cash Boxes to specific machines, or putting barcode identification labels on the Cash Boxes. The Cash Boxes are tracked electronically eliminating most variance issues, and with the custom reports provided to each department, accuracy and efficiency is greatly improved.

Technical Bulletin 201103 March 2011

## Technical Tips

**Question:** What is the procedure for downloading with a BlueWave Tool?

**Answer:** To download Software using the BlueWave Tool proceed as follows:

1. First prepare the SD Memory Card with the desired Software, and insure the memory card is formatted for 16 or 32-bit operation.
2. Next, create a Sub-directory named "DOWNLOAD" in the root directory.

**NOTE:** The directory name of 'DOWNLOAD', must be one word and all Capital Letters!

3. Next, copy the Software File to be downloaded into the "DOWNLOAD" Folder Directory on the SD Card.

**NOTE:** Only one (1) Software File should be loaded into the "DOWNLOAD" Folder Directory, because the first File listed in this Directory will be the one used for downloading! Additional files may be saved on the SD Card, but only the first one in the DOWNLOAD directory will be used by the BlueWave Device.

4. Insert the programmed SD Card into the Memory Slot located on the BlueWave Tool, and turn the BlueWave Device **ON**. The BlueWave Tool will calculate the CRC for the Software File to insure integrity by verifying the File is a valid type for JCM products. This process will take 20-30 seconds when a new File is being used. However, if the file has not changed from the previous use, it will not re-calculate the CRC.
5. LED# 2 will illuminate **Yellow** during the file check operation and will illuminate **Green** when its ready for download.
6. Connect the BlueWave Device to the Validator using the proper Harness for the specific Unit being programmed, and apply power to the Validator. The Tool will determine if the Validator connected is the correct type for the Software File. If the File is suitable, LED# 1 will turn **Green** and LED# 2 will extinguish (go out). Any error that occurs will be indicated by LED# 1 flashing a **Red** Error Code sequence.
7. Next press the "LOAD" Button on the BlueWave Device. LED# 1 will turn **Yellow** during the Memory Erase Period and then alternate flash between **Green** and **Red** while the Software is being downloaded.
8. LED# 1 will turn **Yellow** again during the CRC verification process and then LED#1 & 2 will turn **Green** to indicate a successful download has occurred.

**NOTE:** If LED# 1 is flashing **Red**, count the Flashes and check Error Code Table 1 above to determine the possible problem.

- A. USB Connector Type A (Host)
- B. RJ45 Serial Connector
- C. Comm/Ops Status(LED1)
- D. Memory Status(LED2)
- E. Battery Status(LED3)
- F. Download Activation Switch
- G. Function Selection Switch (not used at this time)
- H. Power ON/OFF Switch.

Table 1 LED Error and Operational Indications

LED #1*	LED #2†	Condition
OFF	OFF	IDLE
OFF	RED Flashing	SD Card not found
OFF	YELLOW Flashing	Verifying file on SD Card
OFF	1 RED Flash	Unable to open SD Card
OFF	2 RED Flashes	Unable to open File
OFF	3 RED Flashes	File Error – wrong type or corrupted File
OFF	Lit GREEN	CRC File check complete, ready to start
YELLOW Flashing	OFF	USB Connecting
RED Flashing	OFF	Validator Connection Issue (No response)
Lit GREEN	OFF	Connected, ready to start
1 RED Flash	OFF	Error connecting to Validator (incorrect response)
Lit YELLOW	OFF	Waiting for Validator to report
RED/GREEN alternating Flashes	OFF	Busy Programming
Lit GREEN	Lit GREEN	Program finished, CRC verification complete, Successful Download occurred
3 RED Flashes	Lit GREEN	Program failed, CRC error

\* LED #1 indicates a BlueWave Operational Status or Communications occurrence.

† LED #2 indicates a File or Memory Card Status occurrence.
