

PERIPHERAL NETWORK ADAPTER (PNA®)

CASINO PERIPHERAL MANAGEMENT

- When used with the FUZION system, the PNA unit provides health monitoring and performance reports in real time for JCM's iVIZION bill validators and GEN5 thermal printers.

ADDITIONAL REVENUE OPPORTUNITIES

- By utilizing an API, third party servers can interface with iVIZION bill validators, GEN5 thermal printers, and NFC Mobile I/O in an EGM to offer mobile wallet technology, promotional offers, and sports wagering.

DYNAMIC SYSTEM PRINTING

- When used with the iPROMO™ and PromoNet systems, the PNA unit communicates with JCM's GEN5 thermal printer to issue promotional coupons to reward set player behavior.

THE PERIPHERAL NETWORK ADAPTER (PNA®) REALIZES THE CONNECTED CASINO OF THE FUTURE.

The PNA is the pathway to behavioral-based promotional couponing, real time health and performance monitoring, and so much more. In combination with JCM Global's FUZION® and PromoNet® systems, the PNA unit provides networked control over peripheral devices.

Enabling communication among devices, the PNA serves as a bridge between JCM's iVIZION® bill validator, GEN5® thermal printer, NFC Mobile I/O®, the Electronic Gaming Machine (EGM), and/or other device(s) to the network servers for both the FUZION and PromoNet systems.

PERIPHERAL NETWORK ADAPTER (PNA®)

GENERAL SPECIFICATIONS

Communication

- Ethernet
- Serial
- USB
- NFC (with NFC Mobile I/O)

Device Communication

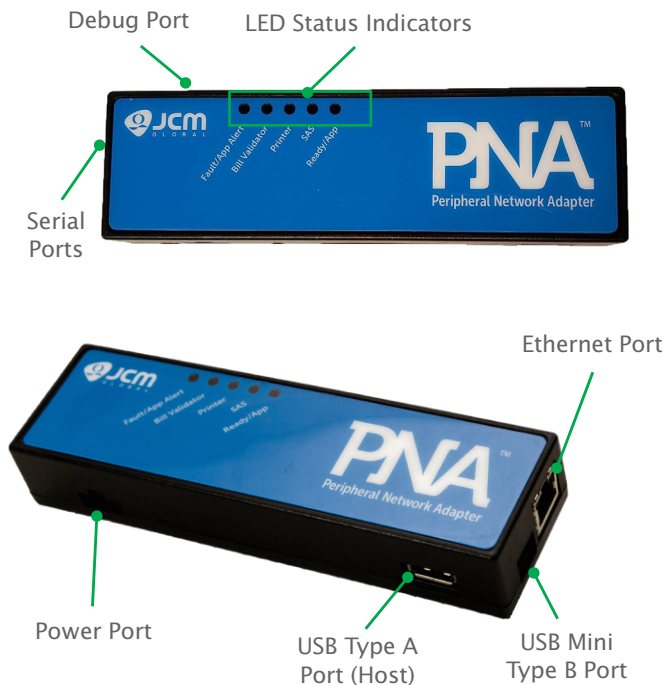

- iVIZION Bill Validator
- GEN2U and GEN5 printers
- NFC Mobile I/O
- SAS Communication for EGMs
- Player Tracking Card Readers

Dimensions

- Length: 6.24"
- Width: 1.84"
- Height: 1"

Power

- Supplied by EGM Printer
- Separate power supply available if needed

PNA IS THE PATHWAY TO MORE.

The PNA unlocks contactless technology at the EGM level and brings more power, storage, and connectivity to your peripheral devices. With the PNA's networked ability, operators can quickly access high resolution bill and TITO ticket images, promotional coupon templates, real-time performance data, and more through the power of JCM's FUZION system technology.
