

ILLUMINATING. REVEALING. ENLIGHTENING.

SENTRY®

SMART ENTRY BEZEL

The JCM Global® Sentry® line of smart bill acceptor entry bezels are your first connections with your customers, and an easy way to communicate with your technicians.

HIGHLIGHTS

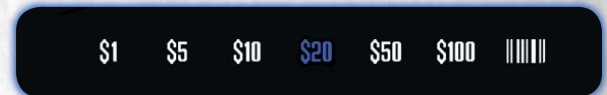

- Last-bill denomination indicator helps settle disputes
- Enhances game product appeal to both operators and players
- Adaptable to virtually any slot machine configuration or software protocol

SENTRY I BEZELS

Sentry 1 bezels utilize LED indicators that list up to six denominations and bar-code, four error indicators, a general fault indicator and a cashbox full indicator. The Sentry I bezels have brilliant Green, Orange, Red and Blue LEDs, making them easily seen on the casino floor for quick error correction.

SENTRY 1 FEATURES

- Uses graphic icons to clearly indicate validator status
- Shows currently enabled denominations and/or bar code
- Displays denomination of last inserted bill
- Runway light pattern indicates “Ready” (front to back) or “Processing” (side to side)
- Brilliant blue trouble light is easily visible from a distance
- Easily installed as a retrofit on most machines
- Low-cost, low-maintenance design
- Controlled by the bill validator – no changes to game software necessary

SENTRY 2.0 BEZELS

The Sentry 2.0 based bezels utilize a two color LCD that provides high resolution and a high contrast display with a customizable graphic feature (utilizing JCM Sentry 2 Programming Software). Sentry 2 bezels are compatible with JCM's iVIZION bill validator, and are plug-and-play ready with no additional changes to the game needed. The bezel has selectable language modes, and selectable viewing modes. "Player" mode is geared at engaging and attracting the customer using interactive graphics and a bright display. "Attendant" mode allows an attendant to examine the last five bank notes inserted, cash box volume level, and any acceptance error that has occurred, if any. "Technician" mode allows the technician to view acceptance rate and the firmware version.

SENTRY 2.0 FEATURES

- Interactive LCD display with Attract, or Player mode (Dims once game is in play)
- Selectable viewing modes – Player, Attendant, and Technician
- Customizable Graphic (uses a single monochrome bitmap image)
- Supports English, French, Spanish, Czech, German, Italian, and Simplified Chinese
- System Diagnostics and Health monitoring at the touch of a button (with remote only)
- Includes last 5 bills inserted, cashbox level, acceptance rate, and firmware version

SENTRY 1 AND 2.0 BEZELS AVAILABILITY

- Sentry 1 bezels for UBA/iPRO bill validators are available on a wide variety of gaming cabinets today directly from gaming manufacturers.
- Sentry 2.0 bezels are available directly from manufacturers for the following cabinets:
 - Aristocrat: Verve
 - Bally: Alpha Pro Up and Slant Series
 - IGT: G23 V2, Universal Slant
 - WMS: BB2/BBU, xD
- JCM standard Sentry 1 Bezels are available for UBA/iPRO and iVIZION products
 - UBA/iPRO Sentry I, part number 550-100713R
 - iVIZION Sentry I, part number 550-100794R, 85MM
- iVIZION's Translator Board allows some UBA/iPRO Sentry 1 bezels to be used with iVIZION. The translator board supports all standard Sentry 1 functions and is available in two versions:
 - PN: 300-000033R, Standalone board (no harnesses, shrink tubing and tie wraps)
 - PN: 701-000253R, Inline kit for usage within a harness (includes harnesses, shrink tubing and tie wraps)
 - Before ordering the translator board for retrofits, contact your JCM representative to verify UBA/iPRO Sentry I Bezel compatibility with the iVIZION and translator board
- For adding Sentry bezels to existing cabinets, contact your JCM representative for bezel availability
